

**Ms Tatyana Goldberg**  
**Technical University of Munich**  
**Germany**

**Biography:**

Tatyana Goldberg is a PhD student in Bioinformatics at Technical University of Munich, Germany. In her research Tatyana focuses on applying Machine Learning to answer various biological questions. In particular she is interested in the prediction of protein sub-cellular localization and the understanding of micro-world warfare (prediction of bacterial pathogen effectors). Tatyana is leading students in several scientific projects, including those participating in “The CAFA Challenge” and “Google Summer of Code”.
